

## About Project

AI Competences for Migrant Organizations is a European initiative designed to empower migrant-focused organizations by strengthening their skills and knowledge in Artificial Intelligence (AI). Through workshops, resources, and collaborative events, we aim to harness the potential of AI to improve educational services, digital inclusion, and social integration.

Let's build the future of inclusive,  
AI-powered education — together!

## Project Objectives

- Equip migrant organizations with practical AI tools and strategies.
- Enhance digital education and personalized learning opportunities for migrants.
- Support the social integration of migrants through AI-based solutions.
- Build long-term capacity and collaboration across Europe's migrant networks.

## Activities

Our project features:

- Specialized Workshops on AI fundamentals and applications
- Hands-on Training with real-world AI tools
- Collaborative Sessions for sharing best practices
- Online Resources for continued learning and support
- Multiplier Events to spread the impact to a broader audience

## Project Impact

- Increased Competence in AI among migrant organizations
- Improved Educational Offerings tailored to migrant needs
- Stronger Transnational Networks supporting long-term cooperation
- Greater Inclusion and Empowerment through digital innovation

Co-funded by  
the European Union

## Who can Benefits?

- Migrant and refugee support NGOs
- Adult education centers
- Cultural and integration associations
- Technology and AI educators
- Migrants and learners interested in digital tools

This initiative ensures that the results and tools are widely accessible, used across contexts, and relevant for the future of inclusive education and migration policy.
